

S45: Optical sensor calibration report

Report code: Q7M-284. Public synthetic acceptance document.

Native text and numeric table; these are selectable PDF characters.

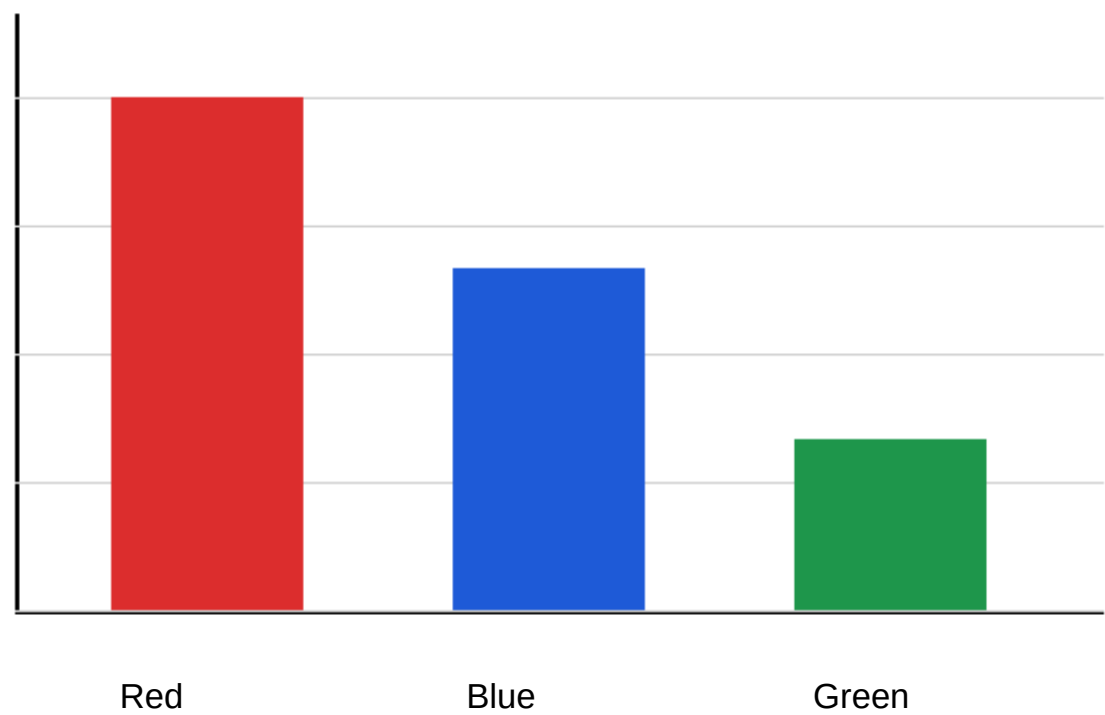

Batch	Observed counts	Correction
A	17	+2
B	29	-3
C	11	+1

Use the observed counts plus each correction for the adjusted total.

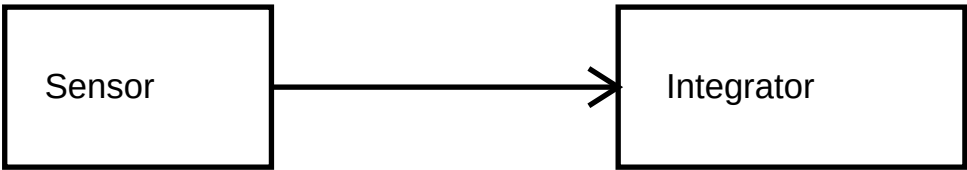

See page 2 for the plotted comparison, page 3 for the formula.

Raster chart and vector diagram

The bars are raster image content. The chart values are not PDF text.

Read the tallest color and the red-to-green height ratio.

The arrow above is vector artwork, not a bitmap.

Typeset mathematics and cross-page check

Evaluate the displayed expression at $x = 3$.

$$f(x) = \frac{x^2 + 3x + 2}{2}$$

The superscript and fraction bar are separately positioned PDF objects.

Cross-check: adjusted page-1 total plus $f(3)$.

Do not infer chart colors or the arrow from this text.
